

Looping is a programming technique that allows a set of instructions to be executed repeatedly until a specific condition is met.

Instead of writing the same code multiple times, a loop lets the computer repeat it automatically.

A loop is a control structure that repeatedly executes a block of code as long as a given condition remains true or for a specified number of times.

```
console.log("Hello");  
console.log("Hello");  
console.log("Hello");  
console.log("Hello");  
console.log("Hello");
```

In processing JS

```
text("Hello", 50, 50);  
text("Hello", 50, 80);  
text("Hello", 50, 110);  
text("Hello", 50, 140);  
text("Hello", 50, 170);
```
